---

Junior FullStack Developer with 2+ years of experience in React, TypeScript, Next.js, and Node.js. Skilled in building frontend and backend solutions within microservice-based architectures, with hands-on expertise in Git, GitHub, Docker, and CI/CD pipelines using GitHub Actions. Adept at developing user-focused internal tools and collaborating with cross-functional teams. Excited to contribute to Techster Solutions' innovative environment while growing technical expertise and sharing knowledge with colleagues.

## KEY SKILL

---

- **Frontend:** React.js, TypeScript, Next.js Tailwind CSS, Material UI
- **Backend & APIs:** Microservice-based applications, Node.js, REST APIs, GraphQL, Postgres, Firestore
- **Databases:** PostgreSQL, Firestore
- **Testing:** Jest, Cypress, Vitest
- **CI/CD & DevOps:** GitHub Actions, Vercel, GCP, Docker
- **Collaboration & Agile:-** Scrum, Kanban, Pair Programming, Code Reviews, Jira, GitHub.
- **Other:** Unix/Linux systems.

## Projects

---

### Large JSON Handler FullStack Project *(used by teams in Ikea)*

Developed a **high-performance backend tool (Node.js, TypeScript, JSONStream)** to process large datasets for **IKEA teams**, enabling experimentation and data visualization.

Implemented **memory-efficient streaming, search, and pagination**, designed for scalability and enterprise data use cases.

Applied structured **API integration principles** and cloud deployment strategies, compatible with **Postgres**.

Delivered measurable business impact by enhancing teams' ability to extract insights from large datasets.

GitHub Repository: <https://github.com/saima-khan1/large-json-handler>

Production URL: <https://large-json-handler-client-dun.vercel.app/>

### Game Search App

Built an interactive gaming search platform using React.js, TypeScript, and RAWG.io API, implementing dynamic filtering & search functionality for seamless user experience. Deployed on Vercel.

GitHub Repository: <https://github.com/saima-khan1/react-project>

Production URL: <https://game-search-app-beta.vercel.app/>

## CAREER HISTORY

---

### Hyperstack AB

Oct 2024 - Dec 2024

Full Stack Developer

*Worked on CareLabs Kiosk Application, A Self-check-in system for clinics, enabling booked appointments, walk-ins, and new appointment bookings, with an admin panel for staff management.*

- Delivered and deployed a **self-check-in platform** for clinics, integrating appointments and staff management.
- Built scalable backend services with **Node.js & TypeScript**, improving **API response times by 30%**.  
Designed and automated **CI/CD pipelines in GitHub Actions**, reducing deployment time by 50% and improving reliability.
- Enhanced application quality with **unit and e2e testing (Jest, Cypress)**.
- Collaborated with product and UX teams in an agile setup, driving iterative improvements.

### Hestia Agora

Feb 2024 - May 2024

Frontend Developer

*Hestia Agora, founded in 2021, focuses on enhancing elderly care by developing digital tools that facilitate early identification of malnutrition, measure quality of life, and calculate the impact of preventive measures on both costs and the well-being of the elderly.*

- Developed **progressive web apps (PWA)** with **React & TypeScript** for elderly care solutions.

- Built reusable components that improved frontend delivery speed by **40%**.
- Conducted **pair programming and code reviews**, ensuring maintainable, high-quality code.

### Babelify App

Oct 2023 – Feb 2024

Full Stack Developer

*A language learning application.*

- Built a language-learning web app using React, Node.js, TypeScript, and GraphQL APIs.
- Deployed and maintained using Hasura Cloud with integrated authentication.

### FooCoding

Feb 2023 – Oct 2023

Full Stack Web-Developer Trainee

*Tech training organization focused on full-stack web development with real-time assignments and mentorship.*

- Gained strong expertise in **Frontend Development** using **React.js** and **TypeScript**.
- Developed and maintained applications with **Backend Development** experience in **Node.js**.
- Ensured high-quality code through familiarity with automated testing frameworks.
- Advocated and applied **Agile methodologies** (Scrum, Kanban) to enhance team productivity.
- Developed **problem-solving** and **communication** skills while working collaboratively in team environments.

## Hackathons & AI Exploration

---

### OutSystems AI + Low-Code Hackathon – Malmö, May 2025

Participated in building AI-enhanced solutions using low-code platform OutSystems.

### MindLab AI Hackathon – MindPark Helsingborg, April 2025

Collaborated on AI-based prototypes focused on automation and user experience.

## EDUCATION & QUALIFICATIONS

---

### K.BN. College of Engineering, VTU University, India

Bachelor of Engineering (Instrumentation & Technology)

## Certification & Training

---

### Full Stack Web-Developer

FooCoding, Malmo – 2023

### Agile & Scrum Methodologies Training

### Languages

- **English:** Native.
- **Swedish:** Basics ( Learning for fluency).
